Bachelor of Surveying
Licensed Surveyor

Member - Surveying & Spatial Sciences Institute
Member - Spatial Industries Business Association

Current Position

Shaun is a licensed surveyor based in our Adelaide Office and joined Sawley Lock O'Callaghan in 2004.

He has gained widespread surveying experience in the construction and mining industry prior to gaining his cadastral surveying license in 2006.

Shaun currently supervises all types of survey projects the firm including;

- Control and set-out out of major construction sites
- Boundary Surveys
- Engineering Surveys for infrastructure and civil development

Shaun is involved in the supervision and training of graduates and the implementation of standards for use of the various survey equipment used within the firm.

Major Project Experience

Multi-storey Residential / Commercial Apartments, Mawson Lakes

Supervision of several projects for the same client, involving cadastral survey to define property boundaries, prepare surveys for Community Titling and surveys for the control and set-out of the building structure over a number of floor levels.

Waterloo Windfarm

Liaison with environmental consultants to determine and advise on tower siting for establishment of lease areas to ensure zero environmental impact zones.

The project deliverables included a series of Lease Plans for registration at the Lands Titles Office.

Filtration Plant, Karumba (North Qld)

Supervision of setout & construction works for the Century CMB Zinc/Lead Dewatering & Filtration Plants on the banks of the Norman River - \$400 million project

Road Construction, Port Moresby (Papua New Guinea)

The Poreporena Highway in Port Moresby was the largest Urban Highway scheme ever undertaken in PNG. The \$120 million project was constructed under a “design-build” contract.

Role entailed;

- Acting as the senior project surveyor reporting to the project manager in design, construction & as-built surveys.
- Supervision of 15 field crews and training of graduate surveyors throughout project.

Engineering Surveys, West Lakes Golf Course

Undertaking field survey data collection of existing fairways / surrounds used to design course up-grades.

Project involved processing of digital terrain models to produce 3D CAD drawings.

Residential Estate Subdivision, Strathalbyn

Supervision of field survey operations for a 33 allotment residential estate at Strathalbyn involving;

- cadastral field survey of outer boundary and new allotments
- engineering survey and digital terrain modelling for civil design by the firm’s design team
- as-constructed surveys of earthworks, roadworks, service infrastructure to ensure construction compliance with engineering design plans produced by the firm.

Various plans were produced to verify the inspection and testing and reporting to the project manager.
